BERNARD BLUM
AWARD 2021

- An independent jury selects a winning biocontrol product to receive the Gold award. It must demonstrate an effective solution in the management of pests or diseases while having a low impact on human health and the environment –. Silver and Bronze recognition are also awarded to second and third placed innovations
- For the first time tlast year a fourth award was also introduced for best innovative product assisting the uptake of biocontrol
- Since the first awards in 2015 there have been typically 12 to 15 entries every year
- This year we had 19 entries between the two competitions
- All four winners are given the chance to present their innovations. The shortlisted finalists also have a poster to display their innovations in the ABIM booth.

The Panel of Judges

- Philippe Nicot
 - French National Institute for Agriculture, Food and Environment (INRAE) Montfavet, France
- Alberto Urbaneja
 - Valencian Institute of Agricultural Research (IVIA), Spain
- Johannes Jehle
 - Julius Kühn-Institut, Darmstadt, Germany
- Owen Jones (Coordinator, Judge and Chair), UK
- In the case of a tie David Cary has a casting vote

What we look for ?

- Each entry is scored independently by each judge against four criteria:
- **Scientific** Foundation and Merit
- Degree of **Innovation**
- Contribution to **Sustainable Agriculture**
- **Commercial** opportunity
 - Has to be for biocontrol
 - Has to be registrable if required
 - Has to be novel
 - Has to have the potential to make an impact in the market

Scoring

- Each judge evaluates every entry against the four criteria:
- Scientific, Innovation, Sustainable Agriculture and Commercial
- Adding the scores for each criteria gives a total score for that entry.
- The entries are then ranked first to last by each judge
- Owen Jones then combines all the rankings to give an overall rank – first to last
- All entries are eventually listed on the IBMA website
- The products Assisting Biocontrol Uptake are also assessed using the same criteria
- The winner and 2nd and 3rd place are announced at ABIM together with the winner of the Assisting Biocontrol Uptake category

Finally,

- Please consider entering your product in the future
- Remember to highlight the four essential criteria
- Best of luck!
- Thank you!
