

# Venso Labs

## Revolutionising seed coating technology

- VensoFlow: 100x more even drying, separates biologicals using layers, all-in-one easy process
- Layered film replaces powders to cut dusting, pollution, OH&S, freight & handling costs
- Insights & control platform with granular dose management and temperature / energy optimisation
- Transient heat exposure of seed and coating maximises microbial survival rates during drying

**VensoFlow  
on  
premises**

**or mobile  
units**

**biological  
survivability**

**EU regs:  
no dusting**

**cut costs,  
inc profit**

**accurate dosing,  
cut energy & waste**

**Seeking foundation partners for Venso Lab's seed technology and control software:**

- chemical formulators
- seed processing machinery manufacturers
- seed coaters
