FOLIAR BIO FUNGICIDE

AWE by Bioversio

The **AWE** works against a broad spectrum of pathogenic fungi and prevents their development.

Unlike other biological products, **AWE** bio fungicide maintains exceptional stability in challenging environmental conditions, making it easily adaptable for use on professional agricultural farms.

Biologically active compounds of the foliar application bio fungicide **AWE** are synthesized through the cultivation of soil-borne bacteria along with green waste, ensuring that bio fungicide is safe for the environment and humans.

AWE's efficacy is proven during numerous laboratory tests and annual field trials.

AWE is pending registration and is not currently available for sale in any market.
